ABOUT ME

I'm a frontend-focused software engineer with hands-on experience building modern web applications using Angular, TypeScript, HTML, and CSS. I enjoy creating clean, responsive interfaces and turning complex ideas into intuitive user experiences. Through my projects and internship, I've worked on real-world systems including booking platforms and real-time applications, while also gaining solid experience with backend integration using .NET and REST APIs.

EXPERIENCE

ZenDev — Software Development Intern

Mar 2025 – Aug 2025

Worked on full-stack web development using .NET Core and Angular. Built and improved real-world application features, focusing on clean architecture and maintainable code. Collaborated with developers using Git and agile workflows. Gained experience in REST APIs, database integration, and frontend-backend communication. Participated in debugging, testing, and code reviews.

Technologies: C#, .NET Core, ASP.NET Web API, Angular, TypeScript, MySQL, Entity Framework Core, Git

PROJECTS

ZenFood — Food Ordering Platform

- Developed a real-time group ordering system using **Angular, .NET Core, and SignalR**
- Implemented authentication with JWT and Google OAuth
- Built features order management, item tracking, transactions, and user profiles
- Designed responsive UI using Angular Material and Tailwind CSS

VolanGO — Vehicle Management Platform

- Built a full-stack rent-a-car system using **ASP.NET Core, Angular, and PostgreSQL**, covering the complete booking flow from vehicle search to reservation and payment
- Implemented real-world features including availability filtering, reservation management, Stripe payments, and notifications (SendGrid, Twilio)
- Designed a scalable backend with modules for fleet management, reservations, payments, and customer support (damage reports, reviews, invoicing)

RoomWise — Hotel Booking & Management System

- Developed a platform for hotel booking with separate user and admin functionalities
- Integrated payment system concepts and recommendation features
- Designed scalable backend architecture
- Implemented an **AI-powered** recommendation system using **ML.NET** to suggest rooms based on user preferences and booking history

ZombieSurvival — Unity Game Project

- Built a survival-style game using **Unity and C#**
- Implemented player mechanics, enemy AI, and game logic
- Focused on object-oriented design and game development principles

EDUCATION

University Džemal Bijedić of Mostar
| Mostar, Bosnia and Herzegovina

Sep 2022 – Feb 2026

Bachelor's Degree in Computer Software Engineering

Key Modules: Web Development (HTML, CSS, JavaScript, Angular), Object-Oriented Programming (C++, C#), Software Engineering, Databases (MySQL, PostgreSQL), .NET Development, Mobile Application Development (Flutter), Game Development (Unity3D), Internet of Things (IoT) Arduino, Cybersecurity

High School of Electrical Engineering Sarajevo
| Sarajevo, Bosnia and Herzegovina

Sep 2018 – Jun 2022

Electrical technician of automatics and electronics

Subjects: Automation Systems, Robotics, Electronics, Programming, Internet of Things (IoT)

SKILLS

Programming: C#, .NET, Angular, TypeScript, JavaScript, HTML, CSS & SCSS, Flutter
Databases: MySQL, PostgreSQL, Redis

Tools & Technologies: Git, REST APIs, SignalR, Angular Material, Tailwind CSS, Visual Studio, IntelliJ products

Languages: English, Bosnian (Native)

HOBBIES & INTERESTS

Technology & Learning

Interested in exploring new technologies and improving development skills

Gaming

Enjoy playing video games and learning about game design

Fitness

Regular physical activity and maintaining a healthy lifestyle
